

AquaNano

Aqua One®

25/30/40

Inspiring Excellence in Fish Keeping!

Instruction version: 30/05/2011

www.aquaone.com.au

Important Safeguards

To guard against injury, basic safety precautions should be observed, including the following:

1. Read and follow all safety instructions and important notices in these instructions as well as on the product itself.
2. This appliance is not intended for use by children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.
3. To avoid possible electric shocks, special care should be taken since water is employed in the use of aquarium equipment. For each of the following situations do not attempt repairs yourself. Return the appliance to an authorised service facility for service or discard the appliance.
 - a. If the appliance or any electrical component of the appliance (non-immersible equipment only) falls into the water or gets wet, do not reach for it. Unplug it and then retrieve it.
 - b. If the appliance shows any sign of abnormal water leakage, immediately unplug it from the power source.
 - c. Carefully examine the appliance after installation. It should not be plugged in if there is water on parts which are not intended to be wet.
 - d. Do not operate the appliance if it has a damaged cord or plug, or if it is malfunctioning, or dropped or damaged in any manner.
4. A “drip loop” (see graphic) should be arranged for each cable connecting an aquarium to a power supply. The drip loop is the part of the cable below the level of the power supply. It prevents water travelling down the cable and coming into contact with the power supply. If the plug or the socket does get wet, do not unplug the appliance. Disconnect the fuse or circuit breaker that supplies the power to the appliance, then unplug and examine for presence of water in the socket.
5. Always unplug the appliance from the electrical outlet when not in use, before putting on or taking off parts, before any type of maintenance or cleaning.
6. Never yank the cable to pull it from the socket. Pull the plug carefully to disconnect.
7. Do not use the appliance for reasons other than the intended use. The use of attachments that are not recommended or sold by the manufacturer may cause the product to be unsafe. This is not recommended.

8. Do not install or store the appliance where it will be exposed to weather or temperatures below freezing.
9. Make sure any component mounted on a tank is securely installed before operating it.
10. Ensure input voltage is the same voltage as your local power supply.
11. If an extension cable is used it should have the proper rating. Care should be taken to arrange the cord so that it will not be tripped or pulled.
12. A G.F.C.I (Ground fault circuit interrupter) & surge protector is recommended for all electrical appliances.
13. Ensure your hands are dry when turning the power switch on/off and when inserting/removing the power cable from the socket.
14. If you are in any doubt about the electrical installation or safety of this product you must consult a qualified electrician.

For Guarantee Conditions, please refer to the Guarantee form that is enclosed with this product.

All products are supplied with fitted plugs. This plug should not be tampered with in any way or removed. Removal or tampering with the plug invalidates our guarantee offered with this product.

For UK a 3 pin adaptor is supplied with the product and this must be used.

Before First Use / Preparation

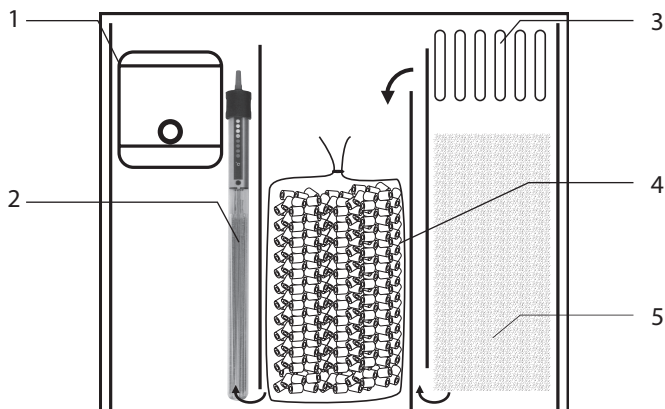

Read and follow all the instructions, even if you feel you are familiar with the product and find a place to keep the instructions handy for future reference. Your attention is drawn particularly to the sections concerning “**IMPORTANT SAFEGUARDS**” and the “**GUARANTEE CONDITIONS**”. Please ensure you retain your original purchase receipt in the event that guarantee service is required.

Carefully unpack the aquarium making sure you keep all the packing material until all the parts of the product have been found and the product has been assembled.

This product is shipped to you in a factory sealed carton. Should the product malfunction in any way or if the unit is damaged and requires replacement, contact the retailer where the product was purchased for inspection.

Know Your Filter

Set up/Parts

1. Pump
2. Heater
3. Intake
4. Ceramic Noodles
5. Sponge

Replacement Parts & Filter Media

Use Aqua One Genuine Spare Parts Only. See your local Aqua One Dealer and look for the number listed below for the spare part you require. Alternatively you will find these numbers on the silver label located on the product.

AquaNano 25 Sponge Set	95S
AquaNano 30 Sponge Set	96S
AquaNano 40 Sponge Set	97S
AquaNano 25/30 Impeller	1I
AquaNano 40 Impeller	26I

Set Up Instructions

Refer to previous page for location of filter components.

1. Consider where you are going to place the aquarium. Keep it away from direct light or areas with large temperature fluctuations.

2. Place the aquarium on a flat level surface strong enough to support its weight. We recommend a genuine aquarium cabinet (sold separately) rather than general household furniture.

3. The filter unit comes preassembled with the exception of the heater and pump.

4. Install the heater in the location show on previous page. Follow the instructions supplied with the heater to set the temperature. **DO NOT** turn the heater on when it is not submerged.

5. Remove the pump from its box and locate the straight outlet (as shown in the pump instructions). Place the pump in the filter as shown in the diagram on previous page. Align the pump outlet with the outlet hole in the front of the filter and push the straight outlet into the pump. Ensure the pump is secured firmly using the suction cups on the rear of the pump.

6. Wash the substrate that will be used in the aquarium. In order to do this, place a portion of the substrate into a bucket and run water through it, churning with your hand. Continue until the water running out of the bucket is clear. Place the washed substrate into the aquarium.

7. Add any rocks or ornaments into the aquarium.

8. Attach the light unit to the rear of the aquarium. The light unit should be secured to the right hand side of the rear glass. Ensure the fastening screws are tightened enough that the light unit does not move.

9. It is now time to fill the aquarium with water.

In order to fill the aquarium, it is important to fill the filter unit first. Because the filter is a sealed unit, filling the aquarium while the filter is empty will result in the filter box floating as the water level rises. Ensure the correct dosage of water conditioner (sold separately) is used whenever adding new water to the aquarium.

10. Ensure all power cables are dry and plug the light, heater and pump cables in at the power outlet. Switch the power on.

11. Test pH and adjust if necessary.

Maintenance

DAILY:

Feed your fish as per instructions on your fish food container.

Check temperature

Ensure all equipment is running correctly.

Ensure there is sufficient water in the aquarium. When the water level drops due to evaporation the return pump will begin to suck air, resulting in fine bubbles being distributed through the aquarium. When topping up evaporated water, always use dechlorinated tap water or suitably filtered water.

WEEKLY:

Test water parameters including pH, ammonia, nitrite, nitrate and carbonate hardness. Use quality test kits, Aqua One have a range of test kits (sold separately) which will allow you to easily and accurately monitor your water quality.

Some species require specific water conditions. Please seek advice from your marine aquarium specialist.

FORTNIGHTLY: 25% water change

What you will need: A bucket, gravel cleaner, towel, algae scraper and water conditioner. Fish do not need to be removed while performing a water change.

1. Wash your hands.
2. Check the pH and temperature of both the aquarium water and the new water. Make any adjustments that need to be made to the new water.
3. Once the water is ready to use, remove the light unit and glass lid and place them somewhere safe away from the water where they will not be broken or damaged.
4. Turn the heater and pump off.

6. Place a towel on the floor in front of the aquarium to guard from water spillage.

7. Use an algae scraper and gently remove any algae that is growing on the glass.

8. Using a gravel cleaner, remove 25% of the aquarium water. Take note of how much water is removed and be sure to have enough prepared water to replace all that is removed.

9. Remove the sponges from the filter unit and rinse them in the water that has been removed from the aquarium. Never rinse the sponge or ceramic noodles under tap water as it will kill the beneficial bacteria that live on the filter media.

10. Refill the aquarium using the prepared water. Ensure there is sufficient water so that the pump is fully submerged.

11. Turn the heater and pump back on.

12. Allow the aquarium to run for 30 minutes then check the temperature and pH. Adjust if necessary.

13. Replace the glass lid and light unit.

The filter unit can be removed for maintenance. If it is being removed during a water change, ensure the aquarium is not filled before the filter is replaced as the displacement of water when it is being placed back into the aquarium may cause the aquarium to overflow. Push the filter box into the correct position and hold it down while the filter box fills with aquarium water (water will enter via the pump). Once the filter is in place, top the aquarium up to the correct water level ensuring water conditioner is used on the new water.

MONTHLY: Pump Maintenance

Follow the maintenance instructions in the pump instruction manual to remove and clean the impeller and impeller housing.

Replacing the Light Tube

1. Ensure your hands are dry.
2. Switch off and unplug the power cable.
3. Remove the light unit from the aquarium.
(Allow the unit to cool if it has been running)
4. Slide the plastic splash guard out of the light unit.
5. Gently remove the PL tube by pulling it out of the socket.
6. Place the new tube into the unit ensuring it is securely in place.
7. Insert the plastic splash guard and place the light unit back onto the aquarium.

Trouble Shooting

BUBBLES ARE COMING OUT THE OUTLET INTO THE AQUARIUM

1. The water level in the filter is too low. Add sufficient water so that the pump is fully submerged.

WATER FLOW INTO THE AQUARIUM HAS DROPPED

1. Pump needs to be cleaned. Refer to maintenance instructions in the supplied pump instruction manual in order to clean the pump impeller and impeller housing.
2. Outlet is blocked. Remove and clean the outlet tube.

Specifications

Aquarium Model: AquaNano 25
Overall Dimensions: 25 x 25 x 25cm
Aquarium Volume: 12L
Return Pump Flow Rate: 400L/hr
Heater Wattage: 25W
Light Wattage: 9W PL
Total Power: 40W
Power Requirements: 220 ~ 240V
Suitable: Tropical, Coldwater

Aquarium Model: AquaNano 30
Overall Dimensions: 30 x 30 x 30cm
Aquarium Volume: 22L
Return Pump Flow Rate: 400L/hr
Heater Wattage: 25W
Light Wattage: 9W PL
Total Power: 40W
Power Requirements: 220 ~ 240V
Suitable: Tropical, Coldwater

Aquarium Model: AquaNano 40
Overall Dimensions: 40 x 40 x 40cm
Aquarium Volume: 55L
Return Pump Flow Rate: 500L/hr
Heater Wattage: 55W
Light Wattage: 18W PL
Total Power: 81W
Power Requirements: 220 ~ 240V
Suitable: Tropical, Coldwater

Disposal of used Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product or on its packaging indicates that the product must not be disposed of with normal household waste. Instead, it is your responsibility to dispose of your waste equipment by arranging to return it to a designated collection point for the recycling of waste electrical and electronic equipment. By separating and recycling your waste equipment at the time of disposal you will help to conserve natural resources and ensure that the equipment is recycled in a manner that protects human health and the environment. For more information about recycling this product, please contact your local city office, your household waste disposal service or the shop where you have purchased the product.

Aqua One - Guarantee 1 + 1 Year

The additional 1 Year **Extended Guarantee** applies when you **REGISTER online** with Aqua One. Register your Extended Guarantee at **www.aquaone.com.au**

The Aqua One Aquarium purchased must be installed upon a level surface and weight bearing cabinet and there upon level and load bearing flooring (using a level is recommended). The purchaser must consider the total weight of all items when installing an Aquarium which could be up to 1200kg dependant on the model and accessory items chosen. Consider this, 1L of water = 1kg weight.

About this Guarantee

The Manufacturer or Distributor, of Aqua One goods, is collectively known herein as "Aqua One". Please refer to contact details for Aqua One below or on the applicable Aqua One website. Any product that is covered by its own Guarantee (as enclosed with the product) is subject to the conditions of that Guarantee.

The benefits given to the purchaser, under Guarantee, are in addition to all other statutory rights and remedies which the purchaser has in respect of goods under legislation in the applicable country of purchase. This Guarantee shall not affect any such rights and should be read subject to such legislation.

1.0. Terms and Conditions of Guarantee.

- 1.1. Aqua One warrants to the purchaser, for 1 Year from date of original purchase, to repair or replace goods where fault is found due to defective materials or faulty workmanship and where goods do not operate in accordance with the instructions.
- 1.2. All claims for repair or replacement must be made at place of purchase.
- 1.3. The original and dated Proof of Purchase (receipt) must be supplied with all goods claims. Please also provide this Guarantee where possible.
- 1.4. The Guarantee covers the Aquarium against gluing breakdown resulting in leakage.
- 1.5. All goods subject to claim under Guarantee should be prepared for transportation in the original packaging or other comparable packaging which offers the same degree of protection.
- 1.6. Where goods are repaired or replaced under Guarantee, these goods are Guaranteed for the remainder of either the original Guarantee or Extended Guarantee period.
- 1.7. Where claims on inspection reveal goods are in normal working order, Aqua One will request reimbursement of all reasonable costs incurred.

2.0. Other Terms and Conditions – Extended Guarantee

- 2.1. The Extended Guarantee period is for an additional 1 Year and commences on expiration of the standard guarantee period.
- 2.2. Application for Extended Guarantee is FREE of any registration cost to the purchaser on completion of the Extended Guarantee questionnaire which is found on the applicable Aqua One website (refer below).
- 2.3. Upon receipt and acceptance of the questionnaire, Aqua One will forward (by way of email) a Certificate of Extended Guarantee to the purchaser.
- 2.4. For more information on how we collect, hold, use and disclose personal information provided to us, please refer to our Privacy Statement on the Aqua One websites or write to our Privacy Officer, in your country of purchase.
- 2.5. Where Aqua One determines goods are being used in a manner contrary to the instructions, specifications or this Guarantee, Aqua One reserves the right to terminate Extended Guarantee for such goods and will provide written notice to the purchaser.

3.0. Exclusions and Limitations

Where permitted by local law, the following exclusions and limitations apply in regard to Guarantee:

- 3.1. Glass breakage, for whatever reason caused after Aquarium purchase.
 - 3.2. Goods claims where fault is due to, but not limited by a) misuse b) neglect c) abuse d) fire or flood e) normal wear and tear f) accidental breakage g) Acts of God h) mains voltage fluctuation or supply problems i) connection to any voltage other than what is stated on the rating plate j) modification or tampering to electrical cord or plug, k) vermin, insects or foreign object l) liquid spillage or submersion of goods not designed to sustain such use or duress.
 - 3.3. Where inspections reveal goods are in normal working order including where noise or vibration is consistent with normal goods operation.
 - 3.4. Attempted repairs or modifications by unauthorised persons, including but not limited to the drilling of holes in the aquarium glass by unauthorised persons.
 - 3.5. Where the goods factory rating plate has been removed, altered, damaged or is rendered illegible.
 - 3.6. Where goods are not installed, operated or maintained in accordance with Aqua One's goods instructions, specifications or this Guarantee.
 - 3.7. Replacement or repair of worn consumables or replacement of lost goods, parts or components.
 - 3.8. Costs associated with goods transportation, removal, installation, postage or cost of insurance.
 - 3.9. Any damage incurred whilst installing, transporting or moving the goods.
 - 3.10. Subject to certain local statutory rights and obligations to the contrary, and this guarantee shall not affect those rights or obligations, where, to the full extent permitted by law: 1. all express and implied warranties and conditions under statute or general law, are expressly excluded and Aqua One, where permitted, will limit liability as follows and at Aqua One's option to: in regard to goods either a) the replacement of goods or supply of equivalent goods b) the repair of goods or the cost of replacing the goods or of acquiring equivalent goods OR in regard to services either c) the re-supply of services d) the cost to re-supply services.
2. Aqua One will not be liable for any loss or damage, including consequential loss or damage either directly or indirectly, or for any incidental expenses, of any kind, and in any way whatsoever.

(1) we recommend the use of an Aqua One Cabinet (sold separately) as specially designed to suit the Aqua One Aquarium purchased.

(2) consider total weight of all items such as: Aquarium, cabinet, water, filtration, gravel/substrate, decorations and other equipment.

(3) consumables include items such as filter media/cartridges, impellers and shafts, light tubes, lamps, bulbs and starters.

(4) due to the extremely fragile nature of glass and glass being the main component of an Aqua One Aquarium, we strongly recommend that you advise your insurer and consider adding this item to your policy.

(5) When moving the Aquarium from its original or subsequent set-up location/s the following should be adhered to prior to moving the aquarium: remove all aquatic fish, animals or plants, filtration, gravel/substrate, decorations, other equipment mounted on or in the aquarium and ALL water. Also separate the Aquarium from the Aquarium cabinet or similar household item.

This Aquarium is designed to help simplify general fish keeping. Please note, some specialist fish and aquatic animal or plant keeping require certain considerations, prior to purchase, to ensure proper and successful Aquarium keeping. Therefore, **Aqua One recommends, at time of Aquarium purchase, that you consult with your Aqua One Retailer in regard to the suitability of this product for the types of fishes, aquatic animals or plants you may wish to keep.** Special consideration should also be made in regard to filtration, aquarium heater and lighting requirements to ensure they are specific to your application.
