Artificial Backgrounds

Our new artificial background rocks have been a tremendous success in Australia, and we are now excited to be launching them onto the UK market. The major difference between these realistic looking artificial rocks and other imitation rocks or using natural stone, is that they come with fitted suction cups which enable them to be stuck to the rear, sides or bottom of a terrarium making landscaping possibilities endless. Available in 7 different designs and sizes up to 64 wide x 48 deep x 21cm high. All have a desert sandstone finish.
