Aqua One[®]
Inspiring Excellence in Fish Care!

1+1
YEAR
GUARANTEE

Instruction version: 18/12/2014

www.aquaone.com.au

Important Safeguards

To guard against injury, basic safety precautions should be observed, including the following:

1. Read and follow all safety instructions and important notices in these instructions as well as on the product itself.

2. This appliance is not intended for use by children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.

3. To avoid possible electric shocks, special care should be taken since water is employed in the use of aquarium equipment. For each of the following situations do not attempt repairs yourself. Return the appliance to an authorised service facility for service or discard the appliance.

a. If the appliance or any electrical component of the appliance (non-immersible equipment only) falls into the water or gets wet, do not reach for it. Unplug it and then retrieve it.

b. If the appliance shows any sign of abnormal water leakage, immediately unplug it from the power source.

c. Carefully examine the appliance after installation. It should not be plugged in if there is water on parts which are not intended to be wet.

d. Do not operate the appliance if it has a damaged cord or plug, or if it is malfunctioning, or dropped or damaged in any manner.

4. A “drip loop” (see graphic) should be arranged for each cable connecting an aquarium to a power supply. The drip loop is the part of the cable below the level of the power supply. It prevents water travelling down the cable and coming into contact with the power supply. If the plug or the socket does get wet, do not unplug the appliance. Disconnect the fuse or circuit breaker that supplies the power to the appliance, then unplug and examine for presence of water in the socket.

5. Always unplug the appliance from the electrical outlet when not in use, before putting on or taking off parts, before any type of maintenance or cleaning.

6. Never yank the cable to pull it from the socket. Pull the plug carefully to disconnect.

7. Do not use the appliance for reasons other than

the intended use. The use of attachments that are not recommended or sold by the manufacturer may cause the product to be unsafe. This is not recommended.

8. Do not install or store the appliance where it will be exposed to weather or temperatures below freezing.

9. Make sure any component mounted on a tank is securely installed before operating it.

10. Ensure input voltage is the same voltage as your local power supply.

11. If an extension cable is used it should have the proper rating. Care should be taken to arrange the cord so that it will not be tripped or pulled.

12. A G.F.C.I (Ground fault circuit interrupter) & surge protector is recommended for all electrical appliances.

13. Ensure your hands are dry when turning the power switch on/off and when inserting/removing the power cable from the socket.

14. If you are in any doubt about the electrical installation or safety of this product you must consult a qualified electrician.

For Guarantee Conditions, please refer to the Guarantee form that is enclosed with this product.

All products are supplied with fitted plugs. This plug should not be tampered with in any way or removed. Removal or tampering with the plug invalidates our guarantee offered with this product.

For UK a 3 pin adaptor is supplied with the product and this must be used.

Before First Use/Preparation

Read and follow all the instructions, even if you feel you are familiar with the product and find a place to keep the instructions handy for future reference. Your attention is drawn particularly to the sections concerning **“IMPORTANT SAFEGUARDS”** and the **“GUARANTEE CONDITIONS”**. Please ensure you retain your original purchase receipt in the event that guarantee service is required.

Carefully unpack the aquarium making sure you keep all the packing material until all the parts of the product have been found and the product has been assembled.

This product is shipped to you in a factory sealed carton. Should the product malfunction in any way or if the unit is damaged and requires replacement, contact the retailer where the product was purchased for inspection.

Replacement Parts & Filter Media

Use Aqua One Genuine Spare Parts Only. See your local Aqua One Dealer and look for the spare part you require. Alternatively you will find these numbers on the silver label located on the product.

Impeller	137I
Sponge Pad	137S
Wool Pad	137W
Spong Pad	138S

Setup Instructions

LED T-bar with timer

1. Select the location for your aquarium. Avoid direct sunlight and areas where temperatures fluctuate greatly such as in front of heaters and air conditioners.

2. Place the aquarium on a flat, level surface. We recommend the use of an Aqua One aquarium cabinet.

3. Attach the light unit to the top of the aquarium. Lights first then other covers hooking into the light.

IMPORTANT

Please do not remove the protective waterproof gel cover from the supplied LED light unit. This gel seals the light unit.

When cleaning the gel cover only use a damp cloth.

4. To set up the Filter refer to the separate filter instructions included.

5. Wash aquarium gravel. Place a portion of gravel in a bucket, run water through and churn the gravel until the water running out of the bucket is clear. Repeat this until all the gravel is washed.

6. Place the gravel into the bottom of the aquarium.

7. Place any rocks, ornaments or plants into the aquarium.

8. If the aquarium is to be used for tropical fish, place a heater in the aquarium. Follow the instructions provided with the heater to set up and install the heater.

9. Fill the aquarium with water. The water level should be below the plastic frame on the inside of the aquarium but high enough that the water level is not visible when the aquarium is running.

10. Add water conditioner to the water, follow the directions on the label.

11. Ensure your hands are dry and plug the power cords into a power outlet. Drip loops as described in the important safeguards section of this instruction booklet must be used.

12. Once the unit is turned on at the power outlet the filter should automatically start

13. To switch on the light unit use the switch located on the light unit.

Setting the clock

Press and hold the (+) and (-) keys for 3 seconds. The hours on the display will begin to flash. Set the hours using the (+) and (-) keys. Press the (SET) key, the minutes on the display will begin to flash. Set the minutes using the (+) and (-) keys. Press the (SET) key to complete.

NOTE: Clock operates in 24hr mode only.

Setting the timers

Press and hold the (SET) and (+) keys for 3 seconds. The hours on the display will begin to flash and the white (L1) indicator light will switch on. Set the hour that you want the white LEDs to switch on using the (+) and (-) keys. Press the (SET) key, the minutes on the display will begin to flash. Set the minutes using the (+) and (-) keys. Press the (SET) key, the hours on the display will begin to flash. This is the time that the white LEDs will switch off. Repeat for the minutes. Press the (SET) key to finalise the settings. Press and hold the (SET) and (-) keys for 3 seconds. The hours on the display will begin to flash and the blue (L2) indicator light will switch on. Repeat the above process to set the blue LED switching times. Once programmed, the white and blue timers can be switched on/off manually by pressing the (SET) and (+) [white] or (SET) and (-) [blue] keys.

Manual switching

The light unit can be switched manually by pressing the (POWER) key.

This will cycle through the following options:

1. White LEDs only
2. Blue LEDs only
3. All LEDs off
4. All LEDs on

NOTE: Manual setting will override timer settings until the next automated switch. I.e. if L1 and L2 timers are set to operate from 10:00-18:00 and the light is manually switched off at 11:00, the timer will not switch the light unit on again until 10:00 the following day. Conversely, if the light is manually switched on (options 1, 2 or 4) at 19:00, the timers will not switch the light off until 18:00 the following day.

Tips

It is recommended that for freshwater aquariums, the filter is run for at least 5-7 days before fish are added. This allows the filter to cycle and establish a population of beneficial bacteria which break down waste in the aquarium water.

Check the water parameters such as pH and KH. If you are unsure what the levels should be for your fish, seek advice from your aquarium retailer.

Allow at least a week between fish additions. This allows the biological filter to adjust to cope with the additional waste.

Remember, all fish will grow. When selecting fish, make judgements based on the maximum size the fish will grow, not simply based on the size the fish is at the store.

Consult your local aquarium retailer for advice on stocking your aquarium.

Maintenance

AQUARIUM MAINTENANCE

DAILY:

Feed your fish as per instructions on your fish food container.

Check temperature

Ensure all equipment is running correctly.

Ensure there is sufficient water in the aquarium. When the water level drops due to evaporation the return pump will begin to suck air, resulting in fine bubbles being distributed through the aquarium. When topping up evaporated water, always use dechlorinated tap water or suitably filtered water.

WEEKLY:

Test water parameters including pH, ammonia, nitrite, nitrate and carbonate hardness. Use quality test kits, Aqua One have a range of test kits (sold separately) which will allow you to easily and accurately monitor your water quality.

Some species require specific water conditions. Please seek advice from your marine aquarium specialist.

FORTNIGHTLY: 25% water change

What you will need: A bucket, gravel cleaner, towel, algae scraper and water conditioner. Fish do not need to be removed while performing a water

change.

1. Wash your hands.

2. Check the pH and temperature of both the aquarium water and the new water. Make any adjustments that need to be made to the new water.

3. Once the water is ready to use, switch off and remove the light unit and glass lid and place them somewhere safe away from the water where they will not be broken or damaged.

4. Turn the heater and filter off.

5. Place a towel on the floor in front of the aquarium to guard from water spillage.

6. Use an algae scraper and gently remove any algae that is growing on the glass.

7. Using a gravel cleaner, remove 25% of the aquarium water. Take note of how much water is removed and be sure to have enough prepared water to replace all that is removed.

8. Remove the sponge from the filter unit and rinse them in the water that has been removed from the aquarium. Never rinse the sponge or ceramic cartridge under tap water as it will kill the beneficial bacteria that live on the filter media.

9. Refill the aquarium using the prepared water. Ensure there is sufficient water so that the pump is fully submerged.

10. Turn the heater and filter back on.

11. Allow the aquarium to run for 30 minutes then check the temperature and pH. Adjust if necessary.

12. Replace the glass lids and light unit.

MONTHLY: Filter Maintenance

Follow the maintenance instructions that came with the filter to remove and clean the impeller and impeller housing.

Troubleshooting

If you are in any doubt about the electrical installation or safety of this product you must consult a qualified electrician.

LIGHT UNIT DOES NOT WORK

1. Ensure switch is in the on position on the light unit.
2. Check if its is plugged into the power supply and the switch is on.

AQUARIUM POSSIBLY LEAKING

1. Check if Filter Sponge is blocked and dirty as this can create an overflow.
2. Make sure water level is not to high. Refer to setup instructions.
3. If an air stone is being used check it is not bubbling water over the rim of the aquarium if so turn the air pump down.
4. Make sure the aquarium is sitting on a level surface.
- 5a. Remove the filter pipework from the aquarium. Mark the water level. Remove any excess water that may be sitting on the edge of the aquarium. Leave for an hour. If water level drops proceed to step 5b.
- 5b. Remove the fish, decorations and gravel. Empty the aquarium and clean the glass DO NOT WASH IN SOAP OR DETERGENT. Place a piece of newspaper on a flat level solid surface. Carefully fill the aquarium ensuring not to spill any water on to the newspaper. Leave the aquarium for several hours and then inspect the newspaper for wet patches.

Specifications

Aquarium Model: AquaVogue 135
Dimensions: 42 x 80 x 50cm
Aquarium Volume: 135L
Filter Flow Rate: 850L/Hr
Light Wattage: 44W LED
Input: 110-240V / AC
Output: 14.5V / DC 3A
Suitable: Coldwater, Tropical, Marine.

Aquarium Model: AquaVogue 170
Dimensions: 42 x 100 x 50cm
Aquarium Volume: 170L
Filter Flow Rate: 850L/Hr
Light Wattage: 54W LED
Input: 110-240V / AC
Output: 15V / DC 4A
Suitable: Coldwater, Tropical, Marine.

Aquarium Model: AquaVogue 245
Dimensions: 45 x 120 x 55cm
Aquarium Volume: 245L
Filter Flow Rate: 850L/Hr
Light Wattage: 66W LED
Input: 110-240V / AC
Output: 15V / DC 4A
Suitable: Coldwater, Tropical, Marine.

Correct Disposal of this product	
	This marking indicates that this product should not be disposed with other household waste throughout the EU. To prevent harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

Aqua One Manufacturers Guarantee 1 + 1 Year

The additional 1 Year **Extended Guarantee** applies when you REGISTER online with Aqua One. Register your Extended Guarantee at www.aquaone.com.au

The Aqua One Aquarium purchased must be installed upon a level surface and weight bearing cabinet and there upon level and load bearing flooring (using a level is recommended). The purchaser must consider the total weight of all items when installing an Aquarium which could be up to 1200kg dependant on the model and accessory items chosen. Consider this, 1L of water = 1kg weight.

About this Guarantee

The Manufacturer or Distributor, of Aqua One goods, is collectively known herein as "Aqua One". Please refer to contact details for Aqua One below or on the applicable Aqua One website. Any product that is covered by its own Guarantee (as enclosed with the product) is subject to the conditions of that Guarantee.

Australian Guarantee

Important note: This guarantee applies in addition to the guarantees, rights and remedies conferred by the Australian Consumer Law and other applicable Commonwealth, State and Territory legislation. The guarantee does not exclude, affect or limit those guarantees, rights or remedies, except to the extent that their application may lawfully be excluded or limited.

In particular, our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

International Guarantee

The benefits given to the purchaser, under Guarantee, are in addition to all other statutory rights and remedies which the purchaser has in respect of goods under legislation in the applicable country of purchase. This Guarantee shall not affect any such rights and should be read subject to such legislation.

1.0. Terms and Conditions of Guarantee.

- 1.1. Aqua One warrants to the purchaser, for 1 Year from date of original purchase, to repair or replace goods where fault is found due to defective materials or faulty workmanship and where goods do not operate in accordance with the instructions.
- 1.2. All claims for repair or replacement must be made at place of purchase.
- 1.3. The original and dated Proof of Purchase (receipt) must be supplied with all goods claims. Please also provide this Guarantee where possible.
- 1.4. The Guarantee covers the Aquarium against gluing breakdown resulting in leakage.
- 1.5. All goods subject to claim under Guarantee should be prepared for transportation in the original packaging or other comparable packaging which offers the same degree of protection.
- 1.6. Where goods are repaired or replaced under Guarantee, these goods are Guaranteed for the remainder of either the original Guarantee or Extended Guarantee period.
- 1.7. Where claims on inspection reveal goods are in normal working order, Aqua One will request reimbursement of all reasonable costs incurred.

2.0. Other Terms and Conditions – Extended Guarantee

- 2.1. The Extended Guarantee period is for an additional 1 Year and commences on expiration of the standard guarantee period.
- 2.2. Application for Extended Guarantee is FREE of any registration cost to the purchaser on completion of the Extended Guarantee questionnaire which is found on the applicable Aqua One website (refer below).
- 2.3. Upon receipt and acceptance of the questionnaire, Aqua One will forward (by way of email) a Certificate of Extended Guarantee to the purchaser.
- 2.4. For more information on how we collect, hold, use and disclose personal information provided to us, please refer to our Privacy Statement on the Aqua One websites or write to our Privacy Officer, in your country of purchase.
- 2.5. Where Aqua One determines goods are being used in a manner contrary to the instructions, specifications or this Guarantee, Aqua One reserves the right to terminate Extended Guarantee for such goods and will provide written notice to the purchaser.

3.0. Exclusions and Limitations

Where permitted by local law, the following exclusions and limitations apply in regard to Guarantee:

- 3.1. Glass breakage, for whatever reason caused after Aquarium purchase.
- 3.2. Goods claims where fault is due to, but not limited by a) misuse b) neglect c) abuse d) fire or flood e) normal wear and tear f) accidental breakage g) Acts of God h) mains voltage fluctuation or supply problems i) connection to any voltage other than what is stated on the rating plate j) modification or tampering to electrical cord or plug, k) vermin, insects or foreign object l) liquid spillage or submersion of goods not designed to sustain such use or duress.
- 3.3. Where inspections reveal goods are in normal working order including where noise or vibration is consistent with normal goods operation.
- 3.4. Attempted repairs or modifications by unauthorised persons, including but not limited to the drilling of holes in the aquarium glass by unauthorised persons.
- 3.5. Where the goods factory rating plate has been removed, altered, damaged or is rendered illegible.
- 3.6. Where goods are not installed, operated or maintained in accordance with Aqua One's goods instructions, specifications or this Guarantee.
- 3.7. Replacement or repair of worn consumables or replacement of lost goods, parts or components.
- 3.8. Costs associated with goods transportation, removal, installation, postage or cost of insurance.
- 3.9. Any damage incurred whilst installing, transporting or moving the goods.
- 3.10. Subject to certain local statutory rights and obligations to the contrary, and this guarantee shall not affect those rights or obligations, where, to the full extent permitted by law: 1. all express and implied warranties and conditions under statute or general law, are expressly excluded and Aqua One, where permitted, will limit liability as follows and at Aqua One's option to: in regard to goods either a) the replacement of goods or supply of equivalent goods b) the repair of goods or the cost of replacing the goods or of acquiring equivalent goods OR in regard to services either c) the re-supply of services d) the cost to re-supply services.

4. The LED's used in this aquarium are designed to last up to 5 times longer than conventional light tubes. All LED's are made up of multiple LED diodes and occasionally individual LED's can breakdown as with all LED devices. The effectiveness of your LED will not reduce as much as a conventional light tubes output would over a period of 6 months. We would replace a unit subject to the terms of the warrantee if more than 20% of the individual LED's have failed.

4.1. Aqua One will not be liable for any loss or damage, including consequential loss or damage either directly or indirectly, or for any incidental expenses, of any kind, and in any way whatsoever.

(1) consumables include items such as filter media/cartridges, impellers and shafts, light tubes, lamps, bulbs and starters.

This Aquarium is designed to help simplify general fish keeping. Please note, some specialist fish and aquatic animal or plant keeping require certain considerations, prior to purchase, to ensure proper and successful Aquarium keeping. Therefore, **Aqua One recommends, at time of Aquarium purchase, that you consult with your Aqua One Retailer in regard to the suitability of this product for the types of fishes, aquatic animals or plants you may wish to keep.** Special consideration should also be made in regard to filtration, aquarium heater and lighting requirements to ensure they are specific to your application.
